### What is a Tattoo Cover-up

This is done when clients are either embarrassed or unhappy with their existing tattoo.

Tattoo Cover-up is a special ability to do another tattoo on top of an existing tattoo.

The new tattoo should be positioned and executed in a way to best hide the tattoo it is covering.

None of the old tattoo should be visible and the new tattoo should be beautiful.

  - artists and want to express themselves,
  - to earn extra money or
  - a hobby.
2. Would you trust just anyone to do your tattoo. Do your research on every artist.
